

Quotation

Festoon lighting for
Melksham Town Council

JANUARY
2026

Riverside Walk Festoon

Overall length approx 180m as indicated in Yellow, starting at fence in car park finishing at end of fence near to Skate park area.

1m spacing festoon (same as park lighting scheme) strung on approx 14 poles at 4m height to existing metal fence line.

24v (low voltage) 1m spacing Rubber Festoon strung on stainless steel Catenary wire supported on poles by stainless marine grade fittings. Lamps are to be Poly-carbonate ES LED filament effect lamp (same lamps as bridge). Poles are to be 4m Aluminium 3mm stage structure tubing in RAL9005 Black bolted or banded to existing metal fence.

Total cost £4694+VAT

The site has been surveyed to ensure all costs are included in the above quotation.

Same specification Festoon and poles used in Salisbury to light walkways by the river

Market Place Festoon

Overall length approx 60m as indicated in Yellow.

Option 1

Festoon following route indicated in yellow, continuous festoon at 1m spacing with approx 60 Warm White Filament effect LED lamps starting on Town Hall building, via decorative poles, ending on side of Melksham News building with quick release point for abnormal high vehicle access should it be required.

Total cost £1400 +VAT

Option 2

Festoon following route indicated in yellow, festoon at 1m spacing from building to poles, with closer spacing 0.5m festoon used between each of the decorative poles as the gap is very small due to bad placement of the poles. Overall approx 80 Warm White Filament effect LED lamps starting on Town Hall building, via decorative poles, ending on side of Melksham News building with quick release point for abnormal high vehicle access should it be required, this version requires more installation as it will be completely custom fitted with differing festoon and more lamps, but would overall look best given the layout of the poles.

Total cost £1800 +VAT

The site has been surveyed to ensure all costs are included in the above quotations.
